**UE 3.1F – General Instruction – 5 ECTS**

**Teachers:**
Bernd Schölhorn, Mélanie Ethève-Quelquejeu, Benoit Colasson

**Educational goals:**
Regular participation in research seminars and conferences of invited researchers provides an important insight into the various aspects of research and scientific development. The practice of English through a module on scientific communication provides important support and preparation for professional life.

**Prerequisites:**
M1 validation.

**Program:**

A) **Research seminars – 3 ECTS**
Weekly Scientific seminars, either at Paris Descartes or at Paris Diderot
Written reports on 5 seminars must be provided by the student

B) **Scientific Communication – 2 ECTS**

**Acquired skills:**
Analysis of scientific conferences: To be able to analyze and summarize a scientific seminar, highlighting the context, the method, the results, the conclusion and the perspectives. Know how to communicate in Science with an informed public or an uninitiated public (oral and written, in English).

**Evaluation:**

A) Research Seminars: Continuous examination (100%, see 5 written reports required)

B) Communication: Continuous examination (50%) et final exam (50%)
